Message from the Chairman

The annual report of any organisation is the mirror image of the programmes/activities undertaken by the organisation during the year under report. It depicts the success graph of the ongoing programmes, interventions in the new field of welfare activities, taking up programmes in partnership with Government line departments, national level supporting agencies and above all grass root level people centric organisations. The Koraput Jilla Banabasi Sangha which has come into existence due to yeoman efforts of forest dependent households of 1274 villages is an shining example of people’s involvement in managing village forests which has resulted in ensuring increased forest cover, maintaining bio-diversity of the area and above all addressing the threat posed by climate change all the world over.

Pragati needs to be commended for its tireless efforts in engaging the rural people in diversified agricultural activities, ensuring food security and thereby stopping migration of people. The case study of 30 tribal families in Totaguda village of Nandapur block reflected in the annual report bears testimony to this successful intervention. The diversion based irrigation systems created in different villages ensures availability of water at door steps. The use of solar energy operated water filtration systems provides safe drinking water. Farmers’ Field School at Dayanidhiguda is doing excellent job in training the farmers, upgrading their skills and giving exposure to new scientific techniques. With the support from NABARD, Pragati has facilitated the Jaivik SRI Farmers’ Producer Company,Ltd. with the objective of marketing the produce raised by the villagers. System of Rice Intensification (SRI) principles has been successfully applied in millet production. The organisation is in the forefront in applying SRI techniques in production of other agricultural produces. For this pioneering work, the organisation is selected on global basis to receive Keeling Curve Prize, USA in 2018. The members of Pragati family deserve kudos for this prestigious International Award.

Development dynamics is a changing continuous process. The members of Pragati family are to make themselves updated and upgraded so as to meet the challenges of changing environment in the field of people centric welfare activities. I am confident that the members will rise to the occasion and leave no stone unturned in achieving the cherished goal of all-round development of people for whom they work.

(Prof. Digambar Shatapathy)
Chairman
I am pleased to share our organization’s Annual report 2017-18. We continue to work for changing the quality of lives of the rural poor contributing towards realization of Sustainable Development Goals 1, 2, 5, 7, 8, 10 and 13. The values of transparency and accountability have always been the pillars of Pragati, which are achieved by adhering to principles of good governance.

The dedicated work of Pragati team in facilitating and establishing climate resilient production systems have built upon evidences of impact. The interventions in climate resilient agriculture like System of Rice Intensification (SRI), finger millets and the remunerative half acre model farms have increased farm income, contributes to nutritional food security and the ecosystem of the areas.

Pragati, Koraput creates enabling environment to enhance women’s access to and control over resources, appropriate infrastructures and technology.

I take this opportunity to express my sincere gratitude to all the members of Pragati, Donors and supporters, well-wishers and friends who have encouraged us to continue our work for the betterment of rural community. We are thankful to every member of the community who rekindle our journey towards achieving our mission of alleviating poverty and social exclusion.

Prabhakar Adhikari,
Secretary
ABOUT US

PRAGATI KORAPUT, established on 26th January 1992 and registered under the Societies Registration Act 1860, is working to improve the quality of life of the socio-economically disadvantaged communities in South Odisha. Our efforts stretch out into intertwining principles of conservation and management of natural resources in order to accelerate efforts on ecological restoration as well as improve the living condition of the rural poor. By working on systemic issues that can bring about a multiplier change, we look forward to a future where the local communities determine and move towards desirable practices of resource use based on principles of conservation and social justice. Pragati action areas cover Koraput, Raygada, Malkangiri, Nowrangpur and Kalahandi districts of South Odisha reaching out to 48,803 rural households. Our collaboration with Panchayati Raj institutions, Government, research institutions and affiliation with civil society networks has strengthened our efforts for realization of larger societal goals.

Vision:
To build such a self-reliant society, free from hunger and exploitation, where everyone have right to dignified means of livelihood and through collective action ensure socio-economic justice and ecological balance.

Mission:
To strengthen People’s Organizations that will protect, utilize, control and manage local resources and through collective action, ensure sustainable development for pro-poor governance and bring women, children, tribals and downtrodden, to the mainstream of the society.

Values
- Transparency in all aspects.
- Accountability to the Society.
- Work with team spirit.
- Punctuality.
- Participatory approach in all aspects.
- Sensitive towards women.
- Secular in spirit.

Focus Area of Our Intervention
- Strengthening of People’s Organisations.
- Natural Resource Management
- Sustainable Agriculture
- Climate change adaptation
- Women Empowerment

Partners & Supporters:
The Community with whom we work has been the major contributors of resources besides the Partners who have whole heartedly supported us at different points of time to walk forward in the path to achieve our vision.
Our Programmes

Community Based Organizations:
Pragati, Koraput believes in community-driven development pegged on the premise that systemic change is possible when communities are able to initiate and drive their own development agenda. We have been facilitating diverse range of institutional forms such as Village Forest Committees, Self Help Groups, Farmer Producer Organisations and their federations so as to strengthen the community for obtaining rights, ownership and increased access to resources. The CBOs are strengthened to collaborate with resource agencies, Government line departments and establish linkages with different networks.

Achievements & Impacts:
- 172,131 forest dependent households of 1274 villages organised under the umbrella of District level Forest dependent people’s federation called "Koraput Jilla Banabasi Sangha" are managing their village forests which have increased forest cover and bio-diversity.
- 18,791 hectares of forest lands are made productive through land bundings, orchards and irrigation facilities which have enhanced food security and reduced distress migration of 29,042 forest land title holders under FRA-2006.
- 5789 women of 541 SHGs with own savings of INR 18,650,840 and credit linkage of INR 9,768,500 earned additional income of INR 25,000 to 65,000 through livestock rearing, vegetable production, value addition and small business and shared profits.
- 7666 farmers of 333 Producer Groups are involved in collective farming through increased access to inputs and credit. 85 Producer Groups are involved in marketing of aromatic rice and millets.
- The Jaivik SRI Farmers' Producer Company with annual turnover of INR 23,31,703 is providing services to 387 shareholders and involved in delivery of quality inputs, large-scale aggregation and marketing.

Livelihood Opportunities ........
The livelihood of Krishna Majhi of Mulda village is dependent on forest land and migration. With the support of Koraput Jilla Banabasi Sangha, he got 0.55 decimal of forest land under the Forest Rights Act 2006. Krishna has developed his land through MGNREGS. His land is irrigated by the diversion based irrigation created by Pragati in his village. Krishna is now able to grow different vegetable crops like onion, tomato, brinjal in three cropping seasons in a year and earn INR 36,000 per annum. Earlier he harvested 20 to 30 kg of millets during rainy season only. “I have stopped migrating.” Says Krishna.
Food Security through Sustainable Agriculture:
Pragati, Koraput with its vision to achieve a society free from hunger, has focused on sustainable agriculture for increasing productivity while protecting the eco-systems. The strategies include training in farming skills, improving crop management and crop productivity, irrigation, promoting organic practices and increasing access to markets. So that the farmers can establish sustainable food sources and develop income streams for life in the era of climate change.

- Farmer Field School
Pragati has established a Farmer Field School at Dayanidhiguda in Koraput Block with infrastructures like rain water harvesting, solar powered irrigation, soil conservation, organic farming, varietal trials of crops and farm mechanization for the benefit of small and marginal farmers. A tuber crop nursery has been established where quality planting materials are made available to the farmers. Residential trainings organised in the FFS helps farmers to practically investigate a wide range of cropping practices.

- Agro Service Centre
The small farm holders cannot invest in costly farm machinery and depend on hiring of implements to carryout agricultural operations in their fields. Pragati has established an Agro Service Centre at Padwa in Nandapur Block introducing different types of farmer friendly machinery like tractor, power tiller, drum seeder, millet thresher, grading machine, power weeder and small farm equipments which provide custom hiring to small and marginal farmers at subsidized prices. The Farmer Producer Company is maintaining the Agro Service Centre through revenue generated from custom hiring.
Empowering Women in Agriculture:

2200 women farmers are federated to form a women farmers’ producer company. 183 women farmers’ Producer Groups are involved in collective farming of paddy, millets, pulses and vegetables, out of which 45 Producer Groups have taken up collective marketing of aromatic rice and vegetables achieving household food security and earning additional income. These women have elevated their status as farmers, which was a distant dream for them, though they performed more than 70% of agriculture activities.

System of Rice Intensification

Pragma has been promoting SRI for the small and marginal farmers since 2006. Till date 13,667 small and marginal farmers, adopting SRI in 4259 hectares in Koraput and Raygada Districts have additional food for 5-7 months from own production, out of which 3627 farmers have sold surplus of 1230 tons of paddy earning an average additional income of INR 13765. For the first time SRI principles have been tried with Stress Tolerant Rice Varieties through cluster demonstrations and Head to Head Trials. With adoption of SRI principles in Stress Tolerant Rice Varieties, the farmers have got average yield of 5.8 t/ha in spite of erratic rainfall and climatic stress. Farmers have started conservation of indigenous rice varieties, increased cultivation of aromatic rice and reduced use of chemical fertilizers.

Case of Kumari

Kumari Pujari of Guali village in Kotpad block of Koraput District earned INR 80,100 in 2017-18 which came from selling aromatic rice and vegetables. Her income from agriculture was around INR 25,000 and she used to invest in chemical fertilizers and pesticides. Due to her participation in trainings she has adopted System of Rice Intensification and different organic practices which has reduced investment costs. She is now a member of the Producer Group and a shareholder of the Women Farmers’ Producer Company. Kumari is now recognized as a farmer within her family as well as by the villagers.

Enhancing Food Security

Tilottama Gadaba is a progressive women farmer of Mohantiput village in Kotpad block who adopted SRI in 1.5 acres after her participation in the trainings on Technological aspects of SRI organised by Pragati. She harvested 29 quintals of paddy where she earlier got 18 quintals in traditional method. She had surplus of 11 quintals of rice (out of which 6 quintals of aromatic rice) which could fetch her INR 19250. Earlier she did not have any surplus production in traditional method of rice cultivation. Tilottama is now an active member of the Producer group and encourages other farmers in her community to adopt SRI.
➢ **System of Millet Intensification**

Pragati Koraput is spreading the System of Millet Intensification to ensure nutritional food security of the small and marginal farmers in rain fed areas of Koraput District. 3520 farmers adopting system of millet intensification in 927 hectares of land have got average production of 2.8 ton/ha, more than triple the usual yield. Use of weeders and the introduction of thresher have reduced the drudgery of farmers in cultivation and processing respectively. The awareness campaigns and food festivals have contributed to increase household consumption of millets. 1072 farmers have marketed 641 ton of surplus millets with average price of INR 22,000 per ton.

➢ **Promotion of Pulses**

To increase household consumption and farmers’ income, Pragati, Koraput is promoting pulses for the small and marginal farmers through quality seeds and better cropping practices. 4269 farmers of 44 villages have adopted pigeon pea in 842.2 hectares and got average yield of 10.5 qnt/ha(almost 35% increase). Green Gram and Black Gram are promoted in 313.1 hectares of rice fallows of 627 farmers in Koraput, Raygada and Nowrangpur Districts with support of IRRI through cluster demonstrations and varietal trials using technology like nano and hydrogel. The farmers have harvested average of 5.8 qnt/ha which fetched additional income during lean season. The targeted households have started consumption of pulses and selling the surplus for additional income.

---

**Subsistence to surplus.....**

Raghu Sisha, a tribal farmer of Mangrel village in Nandapur Block has adopted system of millet intensification in 1 acre of land. He used his own seeds and applied only farm yard manure. He harvested 12.6 quintals of finger millet where he earlier got only 4 quintals in traditional method. As production increased, Raghu could sell 6 quintals of Ragi earning additional income of INR 13,200. Earlier farmers like Raghu had never experienced harvesting surplus of millets for selling.
- Value Chain of Organic Spices

As the climate and landscape of Koraput are suitable for spices like ginger and turmeric, Pragati has intervened to promote the spices as cash crops through providing technical knowhow on improved practices in crop management, critical input supports, primary value addition and linking the producers to market. 734 farmers adopting ginger in 240.8 hectares and 648 farmers adopting turmeric in 154.6 hectares have earned profit of INR 76,000 to 82,500 per farmer. The farmers have started conservation of seed materials and primary value addition which fetches them better price.

- Tuber Crops

Pragati with support of CTCRI-ICAR, Bhubaneswar is promoting different tuber crops that can contribute directly to food security of small holders in the face of agro-environmental changes. Different tuber crops like orange flesh sweet potato (OFSP), yam, colocassia, cassava and arrowroot have been promoted for 6445 farmers which have not only increased household consumption, but also the farmers are conserving the planting materials and selling surplus to earn additional income. The installation of arrowroot processing units in 2 villages have reduced drudgery of women and increased volume of marketing.

- Vegetable Promotion

The soil and climatic conditions of Koraput District is favourable for growing off season vegetables throughout the year. Pragati has intervened for promotion of organic vegetables among small and marginal farmers by creating assured irrigation facilities, providing inputs and organizing farmers’ Producer Groups for collective production and marketing. 4615 farmers adopting different organic vegetables earn average income of INR 40,000 to 55,000 per annum. Half acre remunerative model farms demonstrated for 92 farmers have enabled them to earn INR 75,000 to 1,00,000 per annum.
Climate Change Adaptation:
The rural people depend on rain fed agriculture and natural resources for their livelihoods, especially the landless and women headed households are more vulnerable due to climate change. Pragati, Koraput, over the years of its work firmly believes that integrated landscape management can address the challenges of climate change to improve the living condition of rural communities. The measures include enhancing the skills of communities around sustainable management of natural resources, developing eco-friendly infrastructures for irrigation, climate friendly food production and off farm livelihoods.

**Diversion Based Irrigation**
Pragati, Koraput has been mobilising communities for utilisation of perennial streams for irrigation. Gravity based irrigation infrastructures established in 85 villages, protect crops of 2388 farmers against erratic rainfall and also enables them to grow diversified crops in 2154.5 acres of land throughout the year. The farmers are adopting improved practices like system of crop intensification and half acre model farms in the command areas. The farmers earn Rs 55,000 to 1,22,000 per annum which has reduced distress migration and 403 women have raised kitchen gardens which provide their daily needs.

Women and girls trudge 5-6 km, spending 3-5 hours a day to collect water. Contamination of water during rainy season causes ill health and water borne diseases. Pragati has created domestic water supply in 32 villages, out of which filtration systems are installed in 10 villages reducing their vulnerability to water stress.

- **Campaign for Water Conservation:**
Pragati, Koraput with support of NABARD organised the Campaign “Jal Jeevan Hai” (Water is Life) in 550 villages of Koraput District through posters, rallies and walkathons. The water resource maps have been prepared and shared with the line department officials and bankers to develop effective climate change adaptation practices through bringing in the right kind of investment in areas such as irrigation, soil and water conservation, agriculture and animal husbandry.
Promotion of Renewable Energy

Pragati, Koraput has been working to address energy-poverty-climate change nexus through solar energy solutions for diversified uses i.e. home lighting, irrigation and food processing while developing the skills of local youth to generate demand and increase scale.

Interventions

- Installation of Solar home lighting systems for 1180 households has reduced use of 42,480 litres of kerosene per year which has significantly reduced expenditure, contributed to reduction of carbon dioxide and enabled children to study.
- Solar water pumps installed in 4 villages has helped 78 farmers to grow crops in 82 acres land which saves use of fossil fuels and enhanced farmers income.
- Demonstration of solar powered food processing units for rice, finger millet, spices and tuber crops at FFS, Dayanidhiguda in Koraput block has increased awareness of farmers on value addition and reduced emission of greenhouse gases.

Off Farm Livelihoods:

Pragati, Koraput has been investing to create opportunities for livelihood diversification to build resilience and lessen vulnerability especially among landless, women headed households and smallholder farmers.

- Goatary: Pragati, Koraput has supported 412 landless and women headed households for goat rearing with improved management practices like sheds with raised structure, vaccination and insurance. These families now earn average annual additional income of INR 25,000 that support their livelihood needs, purchased land and invested in share cropping. Pragati has mobilised goat sheds under MGNREGS.

- Organic entrepreneur

Organic agriculture is promoted by Pragati for improving the livelihoods of the small and marginal farmers that are especially vulnerable to the adverse effects of climate change. However as organic manures are getting scarce and the knowledge of organic ways of pest and nutrient management are losing ground, Pragati has developed 32 women organic entrepreneurs who prepare and sell different organic products like pot manure, vermi compost, jibamruta which not only fetches an additional income, but also reduces chemical farming practices.

“Goats have given me food and income because I am able to sell them within a short space of time, I have taken lease of half acre land and grow millets ” says Chandrama Bhatra, a landless woman of Baghchuan village in Kotpad Block of Koraput District.
Events & Participation:

 Observation of Akshaya Trutiya: Pragati, Koraput observed Akshaya Trutiya, in its action areas on 29th April 2017. The farmers were oriented on seed selection, seed treatment and demonstration of seed bed by the farmers.

 Participation in PARAB: Pragati, Koraput participated in the District level annual event-PARAB 2017 at Koraput from 16th to 18th November 2018. A stall was put up that showcased Pragati’s interventions in different sectors of livelihood through posters, demonstrations and display boards. The farmers’ producer groups and the Jaivik SRI Farmers Producer Company, Ltd. facilitated by Pragati marketed aromatic rice and millets. The Jaivik SRI Farmers Producer Company launched the Millet Thresher which can reduce the drudgery of the farmers, especially women.

 Participation in National Seminar: The Executive Director, Dr. Luna Panda and the Team Leader Mr. Muralidhar Adhikari of Pragati participated in the National Seminar on Sustainable Rice Production Technology for Increasing Farmers Income held on 20th and 21st January 2018 at the Indira Gandhi Krishi Viswavidyalaya, Raipur. A paper on “SRI with Stress Tolerant Rice Varieties”-Experience of Pragati, Koraput was presented.

 Health Awareness Programme: Pragati, Koraput in association with Directorate of Field Publicity Unit, Government of India, Jeypore organised the Health Awareness Programme on 2nd February 2018 at Dayanidhiguda. Around 250 women, ASHA, Anganwadi workers and Panchayati Raj institution representatives participated in the programme. Hon’ble MLA, Koraput flagged off a rally and addressed the gathering along with other Hon’ble Guests. The participants were sensitized on Prohibition of Early Marriage and different schemes of Government.

 Observation of International Women’s Day: Pragati, Koraput observed the International Women’s Day on 8th March 2018 at Dayanidhiguda. The members of SHGs and farmers participated in the event and interacted with line department officials, bankers and Panchayati Raj institution representatives. On this occasion Pragati, Koraput shared the project “Enhancing nutritional food security and income of the small and marginal farmers of Koraput District” implemented with support of EdelGive Foundation in Kotpad, Borigumma, Koraput, Nandapur and Lamtaput blocks of Koraput District.
Monitoring & Visitors -

**Visit of EdelGive Team:** Ms. Vijayata Verma and Ms. Shilpa Jain from EdelGive have visited Pragati, Koraput field areas in Nandapur and Kotpad blocks for an assessment of the possibilities of intervention to improve the livelihood of small and marginal farmers. They interacted with women SHGs and members of Farmer Producer Groups in Bhursi and Kurmakote villages of Kotpad block, visited the command areas of the diversion based irrigation and half acre model farms in Samili and Barengpally villages of Nandapur block.

**Field Visit of DDA, Koraput:** The Deputy Director Agriculture, Koraput along with District Agriculture Officer and Plant Protection Officer, Nandapur visited the field areas in Nandapur Block. Pragati, Koraput is implementing the special Programme for Promotion of Millets in Tribal Areas of Odisha under which 500 farmers had adopted System of Finger Millet Intensification in 500 acres in Nandapur Block. The officials interacted with the farmers on plant nutrient management, identification and management of pests and diseases.

**Field Visit of DDM, NABARD, Koraput:** NABARD had approved a project for implementation of Diversion Based Irrigation in 5 villages of Koraput and Nandapur Block. As a part of field verification, Mr. Murali Misra, the DDM, NABARD visited the Diversion Based Irrigation of Bailguda village in Nandapur Block. The DBI irrigates 20 acres land of 20 farmers which has substantially enhanced their income.

**Monitoring visits by Tata Trusts:** Mr. Gyandip Pandia, Mr. Tushar Dash, Mr. Ashutosh Pal and Mr. Kiran Pattanaik had visited Pragati action areas in Nandapur and Kotpad blocks for monitoring the SRI & SMI Programme and the Diversion Based Irrigation systems. They provided technical and on field support to the staff and also farmers on Crop planning, half acre models, System of Rice and Millet Intensification and diversion based irrigation.

**Monitoring Visits by IRRI:** The team from IRRI, Bhubaneswar visited the field areas in Kotpad and Borigumma block of Koraput District, Padmapur block of Raygada district and Kosagumuda block of Nowrangpur District from time to time to monitor and provide technical support for the programmes on Stress Tolerant Rice Varieties and Pulses in Rice Fallows. On farm demonstrations and field trainings were conducted on improved package of practices with application of Hydrogel and Nano in pulses, quality seed production and storage.

AUDITOR’S REPORT

We have audited the Balance Sheet of PRAGATI, KORAPUT, At-Pujariput, Po- Koraput, Dist- Koraput (Odisha) as at 31.03.2018, the Income and Expenditure Account for the year ended on that date and the Receipt and Payment Account of the Society under the Societies Act bearing No.-KPT-2035-4/94-95 for the year ended on that date, annexed there to. These financial statements are the responsibility of the Governing Body of the society. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Auditing Standards generally accepted in India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

We report that:

1. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of the audit;
2. In our opinion, proper books of accounts have been kept by the Society so far as appears from examination of the books;
3. The Balance Sheet, Income and Expenditure Account and Receipt and Payment Account are in agreement with the Books of Accounts;
4. In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view in conformity with the accounting principles generally accepted in India
   a. In the case of Balance Sheet of the Affairs of the Trust as at 31.03.2018.
   b. In the case of Income and Expenditure Account, of the excess of income over Expenditure of the trust for the year ended 31.03.2018.
   c. In the case Receipts and Payments Account of the excess of expenditure over income of the Society for the year ended 31.03.2018.
